

# Simigiu Andrei

Web developer

## About me

A results-driven web developer with a solid foundation in both frontend and backend development. I hold a certified diploma in Frontend Development and have experience building responsive, user-focused web applications. I am proficient in modern web technologies and committed to delivering high-quality solutions that meet both client and business needs. Seeking a role where I can further enhance my skills and contribute to a dynamic team.

## Work experience

### Web Developer | YOSEO - SHOPIFY EXPERTS | 2023 - Present

- Developed and customized eCommerce websites on Shopify, delivering tailored solutions for clients' unique business needs.
- Created and optimized Shopify stores by designing pixel-perfect, responsive layouts using Liquid, HTML, CSS, and JavaScript.
- Integrated third-party apps and APIs to enhance store functionality, improving customer experience and increasing conversion rates.
- Tested and implemented custom Shopify features, including dynamic product pages, checkout flows, and user account management systems.
- Collaborated closely with designers and clients to ensure alignment on visual and functional requirements, offering solutions to improve UX/UI.
- Provided ongoing maintenance, troubleshooting, and performance optimizations to ensure smooth operation and scalability of online stores.

### Frontend Developer | FREELANCER | 2021 - 2022

- Developed custom websites for diverse clients, delivering responsive, user-friendly designs aligned with client needs and business goals.
- Specialized in frontend technologies like HTML, CSS, JavaScript, ReactJS, and Tailwind CSS to build engaging, interactive user interfaces.
- Collaborated with clients to understand project requirements, providing creative and technical solutions tailored to their specific objectives.

\*\*\*Projects can be found in Github

### Customer success associate | Ascensos | 2020 - 2023

- Served as a senior point of contact for escalated customer issues, ensuring resolution through advanced problemsolving and communication.
- Focused on delivering a seamless customer experience, offering personalized solutions to maintain high satisfaction rates.
- Provided informal mentorship to junior team members, supporting their growth and improving overall team efficiency.
- Actively contributed to process improvements by analyzing customer feedback and suggesting changes to enhance service quality.

### Team Leader | Valoris | 2019- 2020

- Led a team of customer support agents, providing guidance, support, and training to ensure optimal performance.
- Monitored daily team activities, ensuring compliance with company policies and achievement of performance targets.
- Coordinated workflows and resource allocation to manage peak periods and high workloads effectively.
- Fostered a collaborative and positive work environment, enhancing team morale and productivity.

# Training, stack & skills

---

Before completing the Frontend Development ITSchool course I have been following numerous Udem courses in the last 3 years and created many pages and applications. Started with the basics then proceeded with full stack apps.

**Frontend:** HTML, Liquid, CSS, JavaScript, Bootstrap, TailwindCSS, Shadcn/UI, ReactJs, NextJs, Redux/@redux/toolkit, RTK Query, Yup, formik, zod, react-hook-form.

**Backend:** MongoDB, ConvexDB, NodeJs, ExpressJs, Mongoose, REST API, Git/Github

## Projects

---

### NextJS 14 Docs Clone

Link: <https://docs-clone-olive.vercel.app/>

Developed a real-time collaborative document editing application using Next.js with Convex as the database and Liveblocks for live synchronization. Designed to function as a Google Docs clone, the app supports multi-user editing, real-time presence tracking, threaded comments, and document organization features. Focused on robust backend integration, efficient state management, and seamless user experience in a collaborative environment.

### NextJS 14 Slack Clone

Link: <https://nextjs14-slack-clone.vercel.app/>

Full stack application created with NextJS14, Convex as a real time database and many different packages and features. You can create workspaces and channels and direct message other members. You can also login and authenticate using credentials, Github provider and Google provider.

### E-Commerce Full Stack Application - techie

Link: <https://itschool-techie-project.onrender.com/>

Full stack MERN application using Redux for state-management. You can register, login, explore different categories and products, add them to favorites and cart, place an order and pay via PayPal.

### Weather App - weatherapi app

## Education

---

### Frontend Developer Certification | ITSchool | 2022 - 2023

Completed 100 hours course and received certificate of completion, Minister of Education and Research diploma. Before taking the course I completed numerous Udem courses in the last almost 3 years.

### Power Engineering | POLITECHNICA University of Bucharest | 2014 - 2018

Informatics | Vasile Alecsandri National College | 2010 - 2014, Galati
