About me

Passionate web developer with a background in both development and design.
Recently completed an accredited Frontend Development course at IT School, earning a diploma recognized by the Ministry of Education and Research.
Seeking a web or frontend developer position where I can contribute to creating pixel-perfect layouts, implementing and testing backend functionalities, and continuously enhance my skills while bringing innovative ideas to the team.

Work experience

2023 - Present
YOSEO - SHOPIFY EXPERTS
Web Developer

Creating custom ecommerce landing pages and implementing and testing functionalities and features.

2021 - 2022
Frontend Development
Freelancing

Creating custom websites for specific clients with various functionalities.

2020 - 2023
Ascensos SRL, Bucharest
Customer advisor

Developed my problem solving skills along with time management and multi tasking.

2019- 2020

Enhancing my management skills having a team under attention which also helped me develop my social side.

Training and tech stack

Before completing the Frontend Development ITSchool course I have been following numerous Udemy courses in the last 3 years and created many pages and applications. Started with the basics then proceeded with full stack apps.

- HTML
- CSS
- Liquid
- JavaScript
- ReactJS
- NextJS
- Bootstrap
- Tailwind CSS
- Shadcn/ui
- Git/Github
- Redux
- Yup, formik
- zod, react-hook-form
- MongoDB
- NodeJS
- ExpressJS
- Mongoose
- REST API

Projects

Docs Clone Project

NextJS 14 Docs Clone

Link: https://docs-clone-olive.vercel.app/

Developed a real-time collaborative document editing application using Next.js with Convex as the database and Liveblocks for live synchronization. Designed to function as a Google Docs clone, the app supports multi-user editing, real-time presence tracking, threaded comments, and document organization features. Focused on robust backend integration, efficient state management, and seamless user experience in a collaborative environment.

Slack Clone Project

NextJS 14 Slack Clone

Link: https://nextjs14-slack-clone.vercel.app/

Full stack application created with NextJS14, Convex as a real time database and many different packages and features. You can create workspaces and channels and direct message other members. You can also login and authenticate using credentials, Github provider and Google provider.

Ecommerce project:

E-Commerce Full Stack Application - techie

Link: https://itschool-techie-project.onrender.com/

Full stack MERN application using Redux for state-management. You can register, login, explore different categories and products, add them to favorites and cart, place an order and pay via PayPal.

Other projects:
